Re: Modular Block Wall

Dear Resident,

We have been contracted by your Homeowner's Association to replace the wooden retaining walls in the area of your unit. The walls will be replaced with a modular block system. We ask that upon excavation of the existing walls you do not interfere or step inside the construction zone. The area of disturbance will be clearly marked with yellow construction tape.

Depending upon the extent of construction our work will take between a few days to a few weeks. We will not be held responsible for any garden structures or specialty plants inside the construction zone. If you have need of any such items to be removed please give us advanced notice.

We expect to start construction at your unit on or about ..... Construction is weather dependent. Though materials have been acquired, delays beyond our control may exist and we shall make you aware of those as quickly as possible.

Regards,

Chris Reduzzi
